

SHREYA CHOWDARY CHENNUPATI

+1 612 499 0551 — shreyachennupati8@gmail.com — linkedin.com/in/shreyachowdarychennupati/

Software Developer with strong foundations in **Python, backend development, REST APIs, and distributed systems**. Proven experience building **scalable microservices**, data pipelines, and production-ready systems, with hands-on exposure to **cloud deployment, system design, testing, and debugging**. Experienced in Agile development, version control, and end-to-end software delivery.

EDUCATION

University of Florida, Gainesville, FL 08/2024 – 08/2026

Master of Science in Artificial Intelligence Systems

Keshav Memorial Institute of Technology, Telangana 08/2020 – 06/2024

Bachelor of Technology

SKILLS

Languages: Python, Java, Go, C, C++, SQL, JavaScript, TypeScript

Frameworks & Development: Spring Boot, Django, React, HTML, CSS, Bootstrap, JFrame

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD (Azure DevOps), Maven, Firebase

Core Concepts: Data Structures, Algorithms, Distributed Systems, Operating Systems, OOP, REST APIs, Microservices, System Design, Agile/Scrum, Testing, Debugging, Machine Learning

PROFESSIONAL EXPERIENCE

Wislogix Consulting 05/2025 – 08/2025

Software Engineering Intern — AI Systems

Irmo, SC

- Architected backend components for **AI-enhanced outreach systems**, increasing voter and donor contact efficiency by **15%** and improving targeting accuracy by **12%**.
- Streamlined **data ingestion and validation pipelines** for **1,000+** records, resolving **100+** data inconsistencies and saving **10+** engineering hours per week.
- Analysed **AI-driven personalization services** (targeting logic, email automation), reducing rollout time by **35%** and increasing email open rates by **18%** and CTR by **15%**.
- Built **RESTful APIs and real-time analytics dashboards**, enabling backend observability (logging/metrics) and faster, data-driven decisions.

PERSONAL PROJECTS

Driver Drowsiness Detection System 01/2024 – 03/2024

Computer Vision — Deep Learning

- Engineered a **real-time drowsiness and emotion detection system** using **10,000+** facial images, improving inference speed by **25%**.
- Established preprocessing and model-serving pipelines; evaluated performance through **120+** user tests under real-time constraints.

Hand Gesture Recognition System 10/2023 – 12/2023

Machine Learning — TensorFlow

- Constructed a **CNN-based gesture classification pipeline**, using Tensor Flow, Pytorch and Scikit-learn achieving **86% accuracy** through data augmentation and model tuning.
- Refactored training and evaluation workflows to support rapid experimentation and reproducibility.

Attendance Management System 06/2022 – 07/2022

Backend Development — Java

- Delivered a **Java and MySQL backend system** automating QR-based attendance tracking, reducing manual effort by **35%**.
- Added secure authentication, data storage, and dynamic report generation to improve reliability and data integrity.

On-Demand Car Wash Platform 12/2021 – 03/2022

Full Stack Development — Spring Boot

- Designed **RESTful backend services** in Spring Boot to support booking, tracking, and reviews for **300+** users.
- Enforced **role-based access control (RBAC)** across three distinct user groups.

LEADERSHIP & ACHIEVEMENTS

Head of Street Cause — Two-time **All-India National Winner (Dance)** — **National-Level Choreographer**
